SUMMARY

Full Stack Developer and AI Engineer with hands-on experience building production-grade AI systems, scalable web applications, ML classification pipelines, and real-time computer vision solutions. Proficient in React.js, Next.js, Python, Flask, and Express.js with strong foundations in LLM integration, RAG pipelines, REST API design, and ML model development. Passionate about shipping real-world Generative AI products. Seeking roles in Full Stack, AI Engineering, and GenAI development.

SKILLS

Programming Languages: Python, JavaScript, TypeScript, SQL, Java

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, Flask, REST APIs

Databases: MongoDB, MySQL, Firebase Firestore, ChromaDB

AI / ML: LLMs, RAG Pipelines, Groq, Pydantic, Pandas, NumPy, KNN, MediaPipe, OpenCV, Computer Vision

Tools & Platforms: Git, GitHub, Vercel, Render, Linux

Core Concepts: DSA, OOP, System Design, Prompt Engineering, Authentication

EXPERIENCE

Full Stack Developer Intern

May 2025 – Aug 2025

Global Quest Technologies, Bangalore, Karnataka

- Engineered a production-ready e-commerce platform with product catalog, user authentication, cart management, and order processing using React.js, Express.js, and MongoDB, delivering 5+ core features end-to-end.
- Designed and optimized 10+ RESTful backend APIs improving database query efficiency and eliminating redundant server-side operations across the application.
- Built a fully responsive mobile-first UI across 8+ pages ensuring seamless and consistent UX across all screen sizes and devices.

PROJECTS

ResumeIQ | Python, Flask, React.js, Groq LLM, RAG, ChromaDB, Pydantic | Live Demo

2026

- Shipped a production-grade AI resume analyzer in 15 days with 5 LLM-powered endpoints — ATS scoring, JD matching, keyword extraction, bullet rewriting, and a 2-stage RAG pipeline indexing 53 real job descriptions via ChromaDB and Llama 3.3 70B on Groq (25× latency gain, avg 1.25s).
- Engineered structured output reliability using Pydantic v2 schema validation with auto-retry logic, achieving 100% schema validity across 15 eval test cases and verified prompt injection defense against adversarial resume inputs.

Esophageal Cancer Detection | Python, Machine Learning, Pandas, NumPy

2025

- Built a medical ML classification system with full pipeline across 5+ stages: data preprocessing, feature engineering, model training, and accuracy benchmarking — achieving measurable improvement over baseline using production-level data science practices.

Real-Time Iris Detection System | Python, MediaPipe, OpenCV, Computer Vision

2025

- Developed a real-time iris localization and eye-tracking system using MediaPipe and OpenCV with facial landmark extraction, processing 30+ frames per second for smooth low-latency live-feed performance.

Bird Species Identification | Python, KNN, Pandas, NumPy, Machine Learning

2025

- Implemented an end-to-end KNN classification pipeline across 4 stages — preprocessing, cross-validation, accuracy evaluation, and prediction visualization — achieving 90%+ classification accuracy.

EDUCATION

PES Institute of Technology & Management

Bachelor of Engineering in Computer Science

Shivamogga, Karnataka

Dec 2021 – Jun 2025
