SUMMARY

Full Stack Developer and aspiring AI Engineer with hands-on experience building scalable web applications, ML classification systems, and real-time computer vision solutions. Proficient in React.js, Next.js, Python, Flask, and Express.js with strong foundations in REST API design, database management, and ML model development. Passionate about integrating Generative AI into production-grade applications. Seeking roles in Full Stack, AI Engineering, and GenAI development.

SKILLS

Programming Languages: Python, JavaScript, TypeScript, SQL, Java

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, Flask, REST APIs

Databases: MongoDB, MySQL, Firebase Firestore

AI / ML: Machine Learning, KNN, MediaPipe, OpenCV, Computer Vision

Tools & Platforms: Git, GitHub, Vercel, Linux, Render

Core Concepts: DSA, OOP, System Design, Authentication, CRUD

EXPERIENCE

Full Stack Developer Intern

[May 2025] – [Aug 2025]

Global Quest Technologies, Bangalore, Karnataka

- Engineered a production-ready e-commerce platform with product catalog, user authentication, cart management, and order processing using React.js, Express.js, and MongoDB.
- Designed and optimized RESTful backend APIs improving database query efficiency and eliminating redundant server-side operations across the application.
- Built a fully responsive mobile-first UI ensuring seamless and consistent UX across all screen sizes and devices.

PROJECTS

Campus Marketplace | *React.js, Firebase, Tailwind CSS, JavaScript*

- Architected a full-stack student marketplace with real-time Firebase Firestore sync, Firebase Auth, and a responsive React.js + Tailwind CSS UI supporting concurrent listings and transactions.
- Designed scalable data models and delivered a pixel-perfect cross-device interface with optimized frontend performance.

Esophageal Cancer Detection | *Python, Machine Learning, Data Science*

- Built a medical ML classification system with full pipeline: data preprocessing, feature engineering, model training, and accuracy benchmarking using production-level data science practices.

Real-Time Iris Detection System | *Python, MediaPipe, OpenCV, Computer Vision*

- Developed a real-time iris localization and eye-tracking system using MediaPipe and OpenCV with facial landmark extraction optimized for low-latency live-feed performance.

Bird Species Identification | *Python, KNN, Machine Learning*

- Implemented an end-to-end KNN classification pipeline covering preprocessing, cross-validation, accuracy evaluation, and prediction visualization for bird species identification.

EDUCATION

PES Institute of Technology & Management

Bachelor of Engineering in Computer Science

Shivamogga, Karnataka

Dec 2021 – Jun 2025

CERTIFICATIONS

Generative AI Mastermind – Outskill

Mar 2025

Python Using AI – AI For Techies

Aug 2025

Detect, Analyze, and Recognize Faces – Microsoft Learn

Nov 2025

Generate Images with AI – Microsoft Learn

Oct 2025

Introduction to Microsoft Excel – Microsoft

Sep 2024
